## Shopping Carts

We want Ogone's payment products to work with as many shopping carts as possible.

### Certified Shopping Cart Connectors

Full list of shopping carts that are integrated to Ogone is available on [www.ogone.com](http://www.ogone.com).

# CONTROL

# Flexible payment solutions

## **Scheduled Payments**

Enables processing payments either on a set date in the future on a predefined schedule

## **Subscription Manager**

Enables fixed recurring payments on a predefined frequency

## **Split Payments**

Accepts a combination of payment methods for a single transaction (e.g vouchers / credit card)

## **Payment link via email**

Enables merchant to send customers payment requests by email, redirecting the customer to our secure payment page via a button or link in the email

## **Alias Gateway (*Direct Post*)**

Allows greater control of your page look & feel (including one page checkout), by combining PCI security of e-Commerce with flexibility of DirectLink

# Flexible payment solutions

## Transaction monitoring

Monitor / manage your transactions in real-time (authorisation, confirmation, refund)

## Back-Office languages

Available in 5 languages: FR / DE / NL / UK / IT

## User management

Create and manage different user profiles with specific rights

## Group Manager

Manages all your accounts centrally and enables consolidated billing, while maintaining operational independence for each sub-account

# Flexible payment solutions

## Multi-currency processing

Available in any currency supported by your acquirer

## Electronic Dynamic Currency Conversion (eDCC)

Offers consumers the ability to pay in their local currency (determined at time of transaction)

## Standard & push reports

Download transaction data in the format of your choice (.xls, .csv, .xml).

Possibility to configure tailor-made reports sent by email or posted to your server

# Manage transactions

Transactions are always available in real-time in an advanced Back-Office:

Consult every transaction

Receive automatic order confirmation e-mails

Renew and capture an autorisation

Partially or fully capture and refund a payment

# Report & control transactions

Use reporting tools, available in your advanced Back-Office to:

Search your payment transaction history

Download extended reports in various formats

Download transaction files automatically,  
send them to your systems for updates and  
vice versa by using Push Reports and AFTP

# Optimise reconciliation

Automate major parts of your reconciliation process and reduce your administrative workload and costs:

Automatically match payment transactions to orders

Easily retrieve a full history of every event in the transaction process

Automatically represent chargebacks

Record comments on batches as they are reconciled

[The extra mile]      Customisation in order to match your business

# Manage your account

Add more payment methods, activate new options

Reset password, change company details

Manage different accounts from one place in Ogone Group Manager

Create different user profiles with different user rights in Ogone User Manager

# SECURITY

# Security standards

## Risk categories

### Security

- Data storage infrastructure – security breach
- Website - payment page phishing/pharming

→ Ogone is **fully PCI-DSS compliant**, hence most comprehensive data security standards protect all information processed and stored on the Ogone payment platform.

### Identity theft

- Paying with someone else's card
- Logging in someone else's account and use the registered payment method (account takeover)

### Shopper's illegitimate behaviour

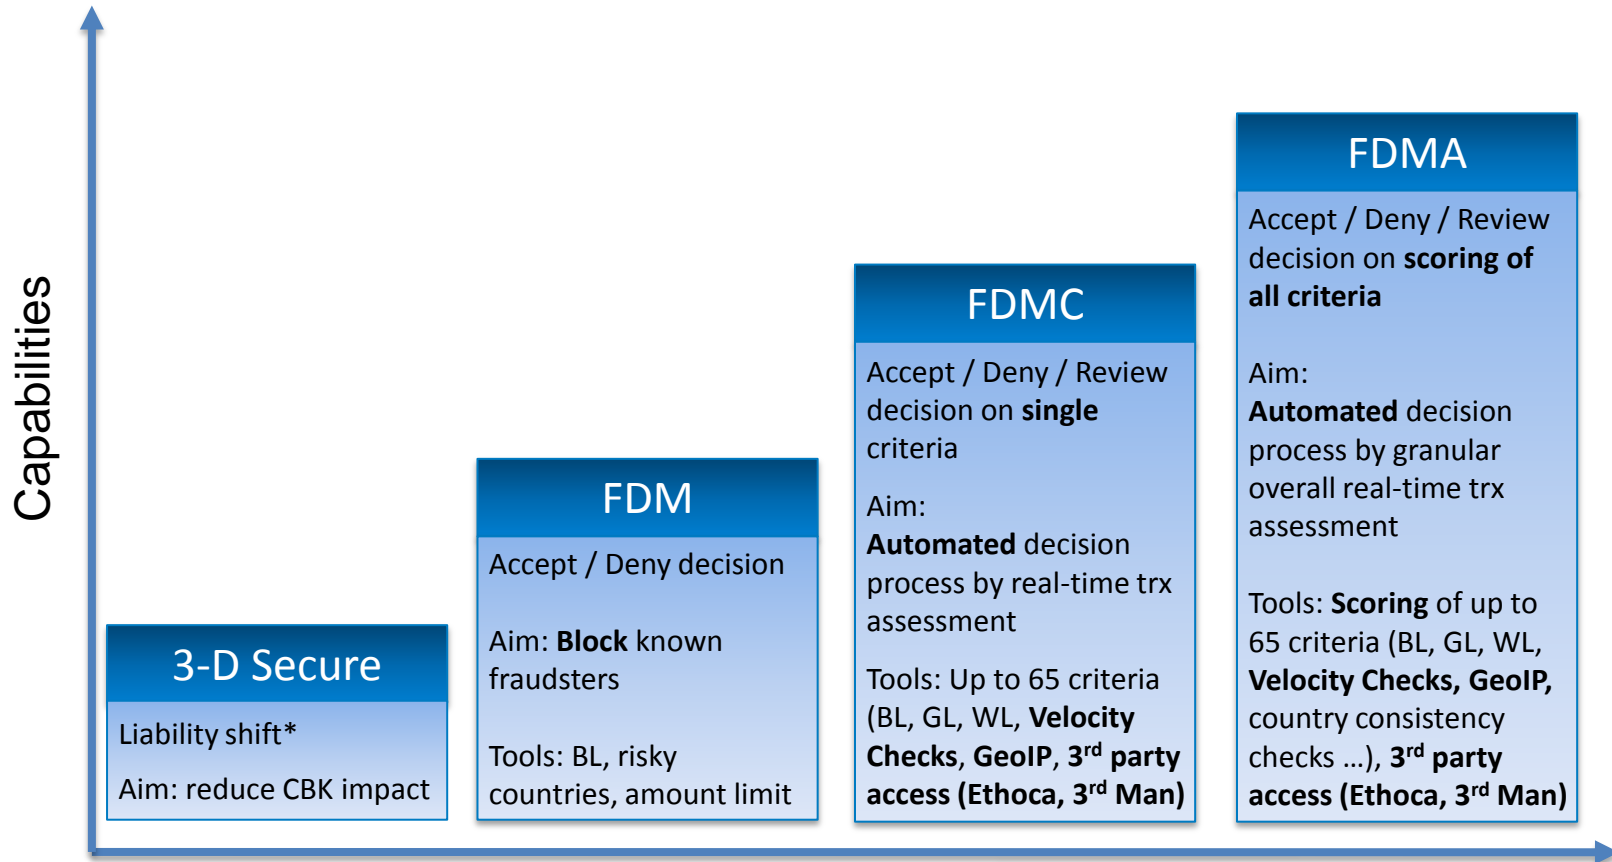

→ Ogone offers a full package of **fraud detection and protection tools**, such as **3-D Secure** and our **Fraud Detection Module Advanced**, one of our most advanced tools allowing you to define your own business specific fraud detection tool.
